Blackjack Rules

- The goal of blackjack is to beat the dealer's hand without going over 21
- The dealer must 'Stand' on 17 or more & 'Hit' on 16 or less.
- Face cards are worth 10. Aces are worth 1 or 11, whichever makes a better hand.
- Each player starts with two cards, the dealer has one card and doesn't receive another until every player has been dealt all their remaining cards
- To 'Hit' (Tap the table behind your cards to show the dealer you wish to 'hit') is to ask for another card. To 'Stand' (wave your hand over your cards to show the dealer you wish to 'stand') is to hold your total and end your turn.
- If you go over 21 you bust, and the dealer wins regardless of the dealer's hand.
- If you are dealt 21 from the start (Ace & 10), you have blackjack.
- Blackjack usually means you win 1.5 x the amount of your bet. Depends on the casino, 'Double Down Entertainment Fun Casinos' pays 2-1.
- Dealer will hit until his/her cards total 17 or higher (16 or less he/she must take another card).
- Doubling down is like a hit, only the bet is doubled and you only get one more card. You can double down when your first two cards total 9,10 or 11.
- Split can be done when you have two of the same card - the pair is split into two hands.
- Splitting also doubles the bet, because each new hand is worth the original bet.
- If you split a pair of Aces you will only be allowed one more card on each hand.
